Every project is easier with the right tools for the job, and the 1200D provides all the tools you need to create expert ready-to-wear garments. The 1200D incorporates three machines in one: it is an Overlock, Interlock and Cover Hem machine in one model. Its versatility is unrivalled, incorporating many flatlock, blanket and overlock stitches, as well as the chain and coverstitch. The 1200D removes the guess-work. Once you select your sewing preference, the 1200D automatically adjusts the correct tension settings so you can sew with confidence. Ease of use is a major feature of this model. All feet are snap on and off for easy change. Additionally, there is no need to change the needle plate or foot for a rolled hem, and retracting the chaining finger is as easy as flipping a lever – both exceptional time-saving features. The 1200D is simply the best machine for quality stitching and finishing. This amazing functionality coupled with 28 optional feet and attachments means that you are only limited by your imagination. Available only at accredited dealers.
