

It's good when a brand has been around a long time.
It's even better when it doesn't show its age.

There are many reasons behind the success of a brand like Pfaff. It's a brand with over 140 years of development behind it and a consistent presence in the marketplace. It has a special air of familiarity, security and reliable quality.

Today's world overloads all of our senses. It reflects the spirit of the times. How do people live their lives, what did they think yesterday, what will they do tomorrow?

What's in and what's out, and most important of all: what do people want?

Pfaff sewing machines are part of this world, because there is one thing that never goes out of style: the search for individuality.

Welcome to the world of Pfaff.

Did you know online you can:

- Purchase embroidery designs
- Update your embroidery machine*
- Download Smart Updates for your Embroidery Software*
- Download free projects and designs
- Visit the online education centre
- See what events are upcoming in your area
- View the complete range of accessories for your sewing machine
- Register for the e-newsletter
- and more!

Why do Pfaff owners love IDT?

Absolutely even fabric feed from both the top and bottom!

During sewing, the fabric is fed simultaneously from both the top and bottom. Absolutely nothing can slip when working with fine fabrics or several layers (it's also wonderful for quilting). Even long lengths of heavy fabrics (typical for home decorating projects) can easily be sewn from beginning to end. IDT guarantees that the feed dogs are perfectly synchronised – you can even sew decorative stitches in reverse with IDT engaged!

The original from Pfaff for over 40 years

The Ultimate Sewing and Quilting Machines

Why Pfaff is Michele Hill's No. 1 choice

I can't live without my IDT, Integrated Dual Feed – the original from Pfaff! The dual feed is just so convenient. I don't have to fiddle around trying to put a walking foot on – it's already there! All my quilting, applique and piecing is more precise and I can add decorative braids effortlessly thanks to the assistance of the IDT!

Another feature that outperforms all other machines for me is the automatic needle up/down feature which lifts the presser foot automatically without hands or even a knee lever! For the hours of applique I do, this is just heaven! Looking for a new machine? I recommend a Pfaff!

For more information visit: <http://williammorrisandmichele.blogspot.com/>
